DETAILED ACTION

Information Disclosure Statement

1. The U.S. Patent No. 4,036,872 to a supposed MacBean has not been considered in view that the patent number given does not correspond to the named patentee. Appropriate correction is required.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the 'attachment members made from coils that are inserted into a transport belt' in claims 14 and 20 must be shown or the feature canceled from the claims. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are drawn to a method for connecting the belt ends of transport belts using a closure aid but the claims include no method steps for carrying out such a method. Hence it is unclear what steps actually comprise the method applicant intends to claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3651

6. Claims 9-22 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0 311 828.

The transport belt and closure aid disclosed by EP 0 311 828 includes all the claimed features as outlined in applicant's disclosure of prior art on pages 4-5 of the specification and figure 1 of EP 0 311 828 that discloses a closure aid including lashing straps 32, 35; lashing mechanism 28 having a first ratchet 7, 8; a winding shaft 23; and lashing lever 14.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following are cited to show the art with respect to closure aids for connecting ends of a transport belt: Daniels et al.('371), Daniels et al.('269), McJunkin, Jr., and Rudy.
